🚀 Static Website Hosted on AWS EC2

Successfully deployed a static website on an Amazon EC2 instance and configured Nginx as the web server to serve the application.

Deployed on AWS Cloud Infrastructure

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to nginx.org.
Commercial support is available at nginx.com.

Thank you for using nginx.

☁️ Static Website Hosting using Amazon EC2, Nginx & Git

📌 What I Built

This project demonstrates static website hosting on an Ubuntu-based Amazon EC2 instance using Nginx as the web server. Instead of serverless hosting (like S3), this implementation provisions compute infrastructure and follows a version-controlled Git deployment workflow, representing a traditional single-tier web architecture.
